Full Stack Web Developer

Skilled in writing clean code with an emphasis on progressive enhancement. Leveraging a background in a startup environment and financial services, I provide a strong analytical approach in my development process while prioritizing user experience and innovation. Bilingual and fluent in English and Spanish.

Key Skills

- **Frontend and Markup:** JavaScript, ES6/ES7, React, HTML5, CSS3/Sass, RESTful APIs, AJAX, JSON, XML, YAML
- **Server-Side:** Ruby on Rails, Node.js, Express, NPM, Pug, Erb, Devise, Passport, JWT, PostgreSQL, MongoDB, SQLite
- **Other:** Visual Studio Code, Ruby Mine, Material Design, Git, GitHub, Chrome DevTools, Sketch, Netlify, Heroku, Yarn, Webpack, Parcel, rbenv

Experience

Recent Projects

Searchy Search: This full-stack web application is an internal search engine for a software sales role. This app is built with Ruby on Rails, uses Devise for authentication and PostgreSQL to hold user data and aid in search queries.

Email Assistant: This Express RESTful API is designed to deliver sales email content on demand. The API serves JSON and uses MongoDB, Passport, custom authentication middleware, bcrypt and JWT.

UrbanMoon: Responsive React app designed to provide current, local weather conditions. App uses geolocation with user permission, Bootstrap 4 for styling and requests JSON from the openweathermapAPI.
